JACK BERMAN
 PRIMARY EXAMINER

The following is an examiner's statement of reasons for allowance: As applicant argues in the remarks accompanying the amendment filed on June 10, 2005, the prior art does not suggest configuring the objective lens in the Müller et al. apparatus so that the focusing magnetic field formed by the lens is stronger at the position of the sample than at the position of the transmitted signal conversion member. Also, applicant's argument that the slit 29 in the Müller et al. apparatus does not constitute applicant's claimed "aperture for obstructing part of the transmitted signal particles" because it does not obstruct any particles from reaching the energy analyzer 28 is convincing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (571) 272-2468. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (571) 272-2477. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
